Programme – Tuesday 7 November

09:00	Welcome from Mr. Peter Large, IWMA technical committee chairman
09:10 – 09:35	Keynote: Energy in the future Prof. Dr.-Ing. Bernhard Hoffschmidt, Aachen University
09:35 – 10:15	PP based insulation for MV and HV cables Mr. Alberto Bareggi, Prysmian Group
10:15 – 10:45	Predicting watertreeing behaviour: how much do we really know? Dr. Simon Sutton, Doble Engineering Company
10:45	COFFEE BREAK
11:15 – 11:45	Latest market developments in the European cable industry Mr. William Plunkett, Integer Research
11:45 – 12:15	CPR standards for cables one year on Dr. Jeremy Hodge, BASEC
12:15 – 12:45	Fire retardant additives and CPR Mr. Martijn Mies, Huber Martinswerk
12:45	LUNCH BREAK
13:55 – 14:35	Next generation cabling technology solutions for the data centre
14:35 – 15:05	Long-term effect of thermal variation on the performance of Cat6A F/UTP cables Ms. Florence Akinuoye, De Montfort University School of Engineering and Sustainable Development
15:05 – 15:35	Monitoring & controlling of wire tension on stranding and similar rotating process machinery Mr. Norbert Schilling, FMS Force Measuring Systems AG
15:35	COFFEE BREAK
16:05 – 16:35	Overview of the Industry 4.0 possibilities in wire manufacture and processing Mr. Ali Shehab, Cimteq Ltd
16:35 – 17:05	Pushing cables harder – how can we manage the thermal risks Dr. James Pilgrim, Southampton University High Voltage Laboratories
17:05 – 17:30	Düsseldorf.... the home of wire Mr. Daniel Ryfisch, Messe Düsseldorf GmbH
17:30	END OF SESSIONS
